No. 1:23-cv-11195-SHS

[PROPOSED] STIPULATION & ORDER RE: DISCOVERY OF ELECTRONICALLY STORED INFORMATION

To expedite the flow of discovery material and to facilitate the consistency in the format of the documents to be produced by the Parties in this case, Plaintiff and Defendants (collectively "Parties"), by and through their respective counsel, hereby stipulate and agree to the terms of this [Proposed] Stipulation & Order Re: Discovery of Electronically Stored Information (the "ESI Protocol" or "Protocol").

1.   This Order supplements all other discovery rules and orders. It streamlines Electronically Stored Information ("ESI") production to promote a "just, speedy, and inexpensive determination" of this action, as required by Federal Rule of Civil Procedure 1.

2.   This Order may be modified in the Court's discretion or by stipulation.

3.   The Parties are aware of the importance the Court places on cooperation and commit to cooperate in good faith throughout the matter consistent with this Court's expectations.

4.   With respect to email productions, the producing party will undertake a reasonable investigation, collect from the custodians it identifies as most likely to have responsive information, and use search terms reasonably calculated to identify responsive materials consistent with the parties' discovery obligations pursuant to the Federal Rules of Civil Procedure. Absent a showing of good cause by the Requesting Party, each Producing Party shall be required to collect from no more than 10 custodians. For the sake of clarity, for the purposes of the limitation on number of custodians, (1) The New York Times is a Producing Party, (2) Microsoft is a Producing Party, and (3) all OpenAI Defendants shall be collectively treated as one Producing Party.

4. Within 30 days of receipt of all document production requests for ESI, the Producing Party shall identify the Search Protocol that it plans to use to collect responsive documents, if any, as set forth in Paragraph 5.

5. The Producing Party's proposed Search Protocol will include: (a) the criteria to be used to identify the universe of documents to which search terms will be applied (including the date range, data sources, and custodians), and (b) proposed search terms to be applied to that universe of documents, subject to revision based on, for example, meet-and-confers of the Parties and the number of hits returned by each term. A Requesting Party may also suggest search terms to be applied.

6. Any Search Protocol will include a requirement for the Producing Party to provide hit reports for proposed search terms prior to utilizing the search terms to narrow the universe of Documents to be searched.

7. The Parties agree to promptly meet and confer in good faith regarding any proposed Search Protocol and to raise any disputes regarding the Search Protocol for resolution by the Court.

5. The Producing Party will in the first instance propose search terms and custodians and corresponding hit reports. The parties will negotiate in good faith, including by meeting and conferring, to identify custodians and search terms. The Producing Party will provide hit reports for proposed search terms to inform such negotiations. If the Requesting Party makes a proposal for additional search terms, the Producing Party must respond within five business days by either accepting a proposal, rejecting it and providing a hit report, or making a counterproposal and providing a hit report. If the Requesting Party makes a proposal for additional custodians, the

Producing Party must respond within ten business days by either accepting a proposal, rejecting it and providing a hit report, or making a counterproposal and providing a hit report.

6. ~~8.~~ The parties will disclose at the outset any use of enterprise messaging tools, such as Slack or MS Teams, including the type of subscription and retention settings in place. The parties will meet and confer regarding issues relating to the parameters for collection of such data, the format of the production, and other unique issues to this type of data, including but not limited to the parsing of the conversations.

7. ~~9.~~ Nothing in this Order prevents the parties from agreeing to use technology assisted review ("TAR") and other techniques insofar as their use improves the efficacy of discovery~~, provided~~.. The parties shall meet and confer in good faith regarding disputes pertaining to the use of TAR. If, after a timely objection and meet and confer conference, the dispute is still unresolved, the party opposing the use of TAR must file a letter with the Court as provided in paragraph 2(G) of the Court's Individual Practices within five (5) business days of the parties ~~agree upon such techniques in advance~~' conference.

8. ~~10.~~ Production Format for ESI.

   a. Except as otherwise provided in this Order, all documents existing in electronic format (e.g., Word, PDF, webpage files) shall be produced as 300 DPI TIFF black and white images with 1-bit depth and with a Bates number stamped on each page, document metadata (including extracted or OCR text), and a link to the associated extracted or OCR text file. The parties will consider re-producing select and specifically identified color

documents as paginated color JPGs upon reasonable request by the receiving party.

b.   Source code and certain other highly confidential technical materials ~~will be produced in native format, on a repository basis, and~~ shall be made available for inspection on a secure computer in a secured room without Internet access or network access to other computers at a secure location determined by the producing party, pursuant to the terms of the parties' separately negotiated agreement for the discovery of "HIGHLY CONFIDENTIAL – SOURCE CODE" materials.

c.   Spreadsheet-type files (e.g., Microsoft Excel), PowerPoint files, and Multimedia files (video, audio, voicemail, etc.) should be produced in native format unless they require redaction. Documents produced in native format should be named according to the Bates number assigned, with the Confidentiality designation appended to the Bates numbers with a hyphen. Single-page Bates-stamped TIFF image slip-sheets will be included for each document produced in native format. The slip-sheets will display the Bates number of the native file, the Confidentiality endorsement, and an endorsement stating, "File Produced Natively."

d.   For Excel and PowerPoint type files that are printed to TIFF for redaction and redacted (rather than redacted in native), the following printing options shall be enabled:

   i.   Excel Print to TIFF Options

      1. Unhide columns and rows
      2. Unhide worksheets

3. Autofit columns and rows, settings to be over by columns first and, then down by rows
4. Print gridlines
5. Do not apply Autofilter
6. Display headings
7. Display comments
8. Header and Footer filename field handling: Show field code

    ii. PowerPoint Print to TIFF Options

1. Print notes pages
2. Print hidden slides
3. Print comments

e. The Producing Party shall also make reasonable efforts to ensure that any spreadsheets produced only as TIFF images because of redactions are formatted so as to be legible. For redacted items which were originally ESI, all metadata fields noted in this protocol that do not contain privileged or protected information will be provided and will include all non-redacted data. A document's status as redacted does not relieve the Producing Party from providing all of the metadata required herein.

f. All attachments, addendums,enclosures, and/or exhibits to a parent document will be, to the extent reasonably possible, produced immediately following the parent document and identified as they relate to the respective parent document with the parent/child relationship intact.

g. The parties shall meet and confer in good faith regarding reasonable methodologies to query or sample training data.

9. ~~11.~~ Metadata. Load or Concordance DAT files should include, where applicable and to the extent it exists and was captured at the time of the collection, the information listed in Exhibit A attached. To the extent that metadata does not exist

or is not reasonably accessible or available for any documents produced, nothing in this Order shall require any party to extract, capture, collect or produce such metadata.

10.   ~~12.~~ Privilege Logs. A party that withholds or redacts documents, ESI, and any other materials and information on the grounds of attorney-client privilege, attorney work product, and/or any other applicable privilege, immunity or protection from discovery, shall produce a privilege log. ~~Privileged~~The following documents and communications need not be included on a privilege log: (1) privileged communications exclusively between a party and its outside or in-house counsel on or after ~~December 27~~September 9, 2023, ~~and~~(2) work product performed by a party at the direction of its outside or in-house counsel on or after ~~December 27, 2023 need not be included on a privilege log~~September 9, 2023, and (3) privileged or work product documents or communications between a party and its outside or in-house counsel related to the following lawsuits and investigations: *Doe 1, et al. v. GitHub, Inc. et al.,* Case No. 4:22-cv-06823-JST (N.D. Cal.); *In re OpenAI ChatGPT Litigation,* Case No. 3:23-cv-03223-AMO (N.D. Cal.); *Authors Guild, et al., v. OpenAI, Inc, et al.,* Case No. 1:23-cv-08292-SHS (S.D.N.Y.); *Alter, et al. v. OpenAI Inc. et al.,* 23-cv-10211-SHS (S.D.N.Y.); *The New York Times Company v. Microsoft Corp. et al.,* 23-cv-11195-SHS (S.D.N.Y.); *Basbanes et al. v. Microsoft Corp. et al.,* 24-cv-00084-SHS (S.D.N.Y.); *The Intercept Media, Inc. v. OpenAI, Inc. et al.,* Case No. 1:24-cv-01515-JSR (S.D.N.Y.); *Raw Story Media, Inc. et al v. OpenAI Inc. et al.,* 1:24-cv-01514-CM (S.D.N.Y.); the pending Federal Trade Commission Investigation, FTC File No. 232-3044, and any other

subsequently filed or commenced lawsuits or investigations relating to OpenAI or Microsoft. Privilege logs shall be served within a reasonable time after the parties' substantial completion of production of documents. The privilege log shall be produced in Excel format and include:

a. A unique number for each entry on the log.

b. Date of document for all ESI and to the extent known or discernible for all hard copy documents. For emails this should be the sent date of the document and for loose ESI this should be the last-modified or create date of the document.

c. Custodian of the document. For emails this should be populated with the metadata extracted from the Custodian(s) field. For loose ESI, this should be populated with the Custodian value assigned to the instance of the document in question.

d. Author of the document. For emails this should be populated with the metadata extracted from the "Email From" field associated with the file. For loose ESI, this should be populated with the metadata extracted from the "Author" field. For hard copy documents, this will be populated with the "Custodian."

e. Recipient(s) of the document where reasonably ascertainable. For emails this will be populated with the metadata extracted from the "Email To" field associated with the file. Separate columns will be included for the metadata extracted from the "Email CC" and "Email BCC" fields, where populated.

f. The type of privilege being asserted, for example: (a) AC for Attorney/Client,

(b) WP for Attorney Work Product, (c) CI for Common Interest.

g. The reason for the redaction. If more than one reason, separate by semi-colons.

h. Nothing in Paragraph ~~12~~10 of this Order shall be read to preclude the parties from logging documents categorically or read to be inconsistent with Local Rule 26.2.

11. ~~13.~~ Any Party that issues a non-party subpoena shall timely notify other Parties when it receives non-party productions of documents, ESI or other responses from the non-party, and shall timely provide copies of all such productions in the format in which they were received from the non-party to the other Parties. If the non-party produces documents or ESI that are not Bates labeled, the Receiving Party will Bates-label the documents or ESI before producing a copy to the other Parties if the produced documents or ESI are of the type so requiring consistent with other provisions of this Order. Nothing in this Protocol precludes a Receiving Party from reviewing a non-party production of documents or ESI and applying (if the non-party produced documents without a confidentiality designation) or elevating a confidentiality designation (e.g., elevating documents designated as "CONFIDENTIAL" to "HIGHLY CONFIDENTIAL - ATTORNEYS' EYES ONLY") if the production contains confidential or extremely sensitive information.

12. ~~14.~~ Technical Variances. Recognizing that each Producing Party may experience production issues due to data systems or files that may not be fully compatible with the technical specifications set forth herein, any practice or procedure set forth herein may be varied by agreement of the Parties, confirmed in writing, to

accommodate such issues and/or where such variance is deemed appropriate to facilitate the timely and economical production of Documents or ESI. No Party shall unreasonably object to any such variance.

13.   15. Reproduction as Natives. The Parties agree that to the extent any Party seeks production in native format of specifically identified ESI produced originally in TIFF form, the Producing Party shall respond reasonably and in good faith to any such request.

14.   16. Pursuant to Fed. R. Evid. 502(d) and (e), the disclosure during discovery of any communication, information, or material that is protected by the attorney-client privilege or work-product protection, as defined by Fed. R. Evid. 502(g), shall not waive the privilege or protection in the above-captioned case, or any other federal or state proceeding, for either that communication, information, or material or the subject matter of the same, unless there is an intentional waiver of the privilege or protection to support an affirmative use of such communication, information, or material in support of the Party's claim or defense, in which event the scope of any such waiver shall be determined by Fed. R. Evid. 502(a)(2) and (3).

15.   17. In the event of an inadvertent production of material protected by the attorney-client privilege or work-product protection, the producing party may notify the receiving party within 30 days after the producing party becomes aware of such inadvertent production. Upon notification, the receiving party shall immediately return, sequester, or destroy the inadvertently-produced Discovery Material and all copies as well as notes, summaries, and/or work product reflecting the content of such material. If only a portion of the Discovery Material is privileged, the

producing party shall immediately provide a new version of the Discovery Material in which the privileged material has been redacted. No further use or disclosure shall be made of the inadvertently-produced Discovery Material, and the receiving party shall take all reasonable and appropriate steps to retrieve and destroy the Discovery Material, and all copies, from any person who has received the Discovery Material through the receiving party.

   IT IS SO STIPULATED, through Counsel of Record.

Dated: _____

                Counsel for Plaintiff

Dated: _____

             Counsel for Microsoft Defendants

Dated: _____

             Counsel for OpenAI Defendants

    IT IS ORDERED that the forgoing Agreement is approved.
